

## Colombia endemic birding trip

We just finished a very successful trip. The best trip ever organised in Colombia. Not so much the number of species is a record. For this you need to organise a trip that goes to the 4 corners of the country. But the number of specialities we found was extraordinary.

To give you an idea: we saw 11 species of Antpitta's, 9 species of Tapaculo, 40 endemics without counting the recent Santa Marta split-offs.

Most were seen by all participants!

Participants are preparing a trip report. Meanwhile I will give you the list of some species seen, together with some pictures.
